MONU KUMAR

Java Backend Developer
monumaner70@gmail.com | +91 7482008710 | LinkedIn | GitHub | Patna, Bihar

Professional Summary

Java Backend Developer with hands-on experience in building secure and scalable applications using Java, Spring Boot, Spring Security, REST APIs, and MySQL. Strong understanding of JWT and OAuth2-based authentication and authorization. Currently developing expertise in Microservices architecture, including service discovery, load balancing, centralized configuration, resilience, circuit breakers, and fallback mechanisms, along with Docker and Kubernetes. Solved 370+ problems on LeetCode, demonstrating strong problem-solving and data structures & algorithms skills.

Education

B.Tech in Computer Science 2023 – 2027
Oriental Institute of Science and Technology, Bhopal , MP
CGPA: 7.5/10.0

Technical Skills

Language:	Java
Frameworks:	Spring, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, REST APIs
Libraries:	Lombok, Bean Validation
Architecture & Design:	Layered Architecture, Microservices Architecture, Builder Pattern, Service Discovery, Client-side and server-Side Load Balancing, Centralized Configuration, Resilience, Circuit Breaker, Fallback Mechanisms
Database:	MySQL
Tools:	Git, GitHub, Postman
Containerization & Deployment:	Docker, Kubernetes

Projects

VoteZy – Online Voting Application *Dec 2025 - Jan 2026*
*Developed a **secure multi-tenant online voting platform** using Spring Boot, enabling organizations to create and manage elections, register voters and candidates, conduct secure vote casting, and process election results through RESTful APIs with JWT-based authentication and authorization.*

- ▷ Built a secure online voting backend using Spring Boot with Controller-Service-Repository layered architecture for modular and maintainable code.
- ▷ Designed and implemented 25+ REST APIs for voter registration, candidate management, election management, vote casting, and election result processing.
- ▷ Modeled core entities including Voter, Candidate, Vote, and Election using Spring Data JPA, with appropriate entity relationships and database persistence.
- ▷ Implemented business validation and voting rules to enforce one-vote-per-user and maintain data integrity.
- ▷ Developed 20+ DTOs using Lombok for efficient data transfer, request/response handling, and reduced boilerplate code
- ▷ Implemented JWT-based authentication and authorization to secure protected voting and management APIs.
- ▷ Developed standardized API responses and integrated a global exception handler for consistent error handling and improved API reliability.
- ▷ Tested and validated REST APIs using Postman.

Certifications & Achievements

- ▷ NPTEL Certified Programming in Java with 93% along with Gold and Elite Badge (OCT 2025)
- ▷ Solved 370+ problems on LeetCode
